

# Certified Information Systems Auditor Manager (CISA) Workshop

## Course Code

SC103

## Duration

4 Days

## Format

Classroom | Classroom/Virtual | Virtual

## Overview

Enhance your career by earning CISA—world-renowned as the standard of achievement for those who audit, control, monitor and assess information technology and business systems. The CISA designation is a globally recognized certification for IS audit control, assurance and security professionals. Being CISA-certified showcases your audit experience, skills and knowledge, and demonstrates you are capable to assess vulnerabilities, report on compliance and institute controls within the enterprise.

Enterprises demand IS audit professionals that possess the knowledge and expertise to help them identify critical issues and customize practices to support trust in and value from information systems.

## Objectives

This event fully covers the current ISACA CISA exam syllabus by explaining how to use ITAF, ValIT and RiskIT to audit and measure an InfoSec Risk Management programme while supporting the core business strategy. Exam question techniques and study plans are also covered.

## Content

### Domain 1:

Information System Auditing Process (21 percent)

### Domain 2:

Governance and Management of IT (17 percent)

### Domain 3:

Information Systems, Acquisition, Development and Implementation (12 percent)

### Domain 4:

Information Systems Operations and Business Resilience (23 percent)

## Prerequisites

Delegates should have a basic understanding of security technologies gained from 3-5 years industry experience or equivalent experience from another training event like Nemstar's CISSP Programme. A basic understanding of information systems and networking is also required.
