

Certificate in Information Security Management Principles (CISMP)

Course Code

SC105

Duration

3 Days

Format

Classroom | Classroom/Virtual | Virtual

Overview

CISMP is essential for anyone wishing to progress their career in the rapidly expanding fields of Information Security, Risk and Cyber especially within the UK public sector. From those wishing to change role to those seeking the senior business role, CISMP is the standard of excellence for all IS Professionals.

We have developed this unique 4 day workshop with extra post-course exam support & webinars fully utilising our extensive 25 years industry experience to ensure you get exactly what need to help manage the risk on the ground AND get that all important first time exam pass. Led by a multi-award winning InfoSec Consultant, this workshop delivers everything you need to pass and take your career to the next level.

Up-to-date and covering all the 9 Domains of Knowledge from the latest 2020 CISMP exam, this program guarantees you the best possible chance of a first-time pass. The industry expert led classroom course explains each topic in depth and detail with the chance to have your questions answered. Using their wealth of real-life experience, the tutor will bring the topic to life with examples and notes from the field.

The CISMP certification is an approved part of UK Government's Certified Professional (CCP) Scheme, licensed by the NCSC (part of GCHQ), proves your expertise in Information Security and provides clearly defined career development paths for public sector employees.

Objectives

This event fully covers the current 2020 BSC CISMP exam requirements.
