

Certified in the Governance of Enterprise IT (CGEIT)

Course Code

SC108

Duration

4 Days

Format

Classroom | Classroom/Virtual |
Virtual

Overview

Certified in the Governance of Enterprise IT (CGEIT), certified professionals can enhance the strategic value they bring to organizations. CGEIT holders bring the knowledge and experience needed to align IT with business strategies and goals, manage IT investments to maximize return on investment and strive for excellence in IT operations and governance while minimizing risk.

The uniquely management-focused CGEIT certification ensures holders understand business, and know how to manage and adapt technology to their enterprise and industry. CGEIT certification holders are consistently recognized among the most qualified professionals in the information security and risk management fields.

Content

This event fully covers the CGEIT exam syllabus by explaining how to use COBIT, ValIT and RiskIT to implement an InfoSec Risk Management programme while supporting the core business strategy.

Exam question techniques and study plans are also covered.

Prerequisites

This event is aimed at senior business managers that are accountable and responsible for the protection and management of the enterprise's IT infrastructure.

As such, it is expected that delegates have a minimum of 5+ years of leadership experience along with strong business acumen.

There is no IT/Network knowledge requirement but a basic understanding is strongly advised.
